Customer Reviews

At 99 cents this is a very good buy. The "double lens" approach does exactly what it is intended to do - help a person with a problem to focus on the area(s) of concern and then to focus closely on the main area in order to find at least one practical, useful step they can take to move forward. Once there is movement, problems can be solved or, if not solved at least, reduced in size. As well as giving a good explanation of the process and examples of how it works, the book also includes lists of ideas that can be used to determine where the focus should be. At the beginning of the book, the author says English is not his first language but that does not, in any way, detract from the reading of it and, he says, he has a conversational style - something I find refreshing, since so many authorities on a subject use a less than friendly style.

Simple quick and to the point there's action items to use and follow so you can use this quick and dirty method right away. It's a lot more sophisticated than it appears to be and is a great starting point

This is an excellent book. It outlines a useful, easy to implement, step-by-step procedure to zeroing in on important aspects of a challenging situation and finding a quick, first-step solution. The procedure can then be used to find the next step, and the next, and so on until the challenge is met. The author provides a list of topics and subtopics that are helpful in surveying a person's life, finding important areas of need and then drilling down to further clarify the "subneeds" that can be the focus of the coach's attention. I highly recommend the book.
