My daughter loves this book! It's been a go to ever since we got it. She loves sliding the little picture over to find out what letter goes with what animal. I did have to send it back for a replacement bc the first copy had a page that was coming unglued. The second copy was better.

Slide and seek board books are the best designed books for very young children. My daughter has

loved books since she was born. She's one now and pretty rough with books. The books that have flaps are cute but no match for her. She rips the flaps right off. With the sliding design she can't rip off anything! She loves this book and loves ABC's and animals! It's perfect! I also purchased the numbers slide and seek board book by the same author and we don't like it as much. It was published after this one, which is surprising because it doesn't work as well. With the numbers book, my daughter gets frustrated bc the parts that slide are very difficult to maneuver. She ends up tearing them out and it becomes a pain for the both of us. The numbers book is not made as well as the alphabet book. I don't recommend buying the numbers book for very young toddlers. But I highly recommend this alphabet slide and seek board book!

Such a great book. It's small and fits into little hands very nicely. The slide pictures slide so smoothly so little ones can easily look through it on their own. I love that the animals actually look like the animal too. I hate how often children's books depict animals in abstract form. Sometimes you just want a bear to be a bear and not a "teddybear".

My 2 1/2 year old twins love the Animal Alphabet book! It's a great book for children since it teaches the alphabet, along with an animal for each letter of the alphabet. The book is also fun because kids can slide the panels over so it gives them a chance to interact with the book. It's made of thick board book material and is the perfect size for small hands. I would highly recommend this book for all young children because it's fun AND educational!

I saw this at a friends house and loved it. I have been a fan of sliding windows and flaps in books since my childhood. So, I naturally had to buy this for my 3.5 yr old daughter. I purchased this one along with the number book by the same author and have not noticed any issues with any of the windows getting stuck or not sliding as some other reviewers mentioned. My daughter loves this book and the number book just as much as I do. These serve as fun tools now that we are focusing more on our alphabet and numbers!

brilliant book. Very clever and well made for little hands

MY son loves these books

very fun book
