Low Riders In Space (Book 1)

Synopsis

Lupe Impala, El Chavo Flapjack, and Elirio Malaria love working with cars. You name it, they can fix it. But the team's favorite cars of all are lowriders—cars that hip and hop, dip and drop, go low and slow, bajito y suavecito. The stars align when a contest for the best car around offers a prize of a trunkful of cash—just what the team needs to open their own shop! ¡Ay chihuahua! What will it take to transform a junker into the best car in the universe? Striking, unparalleled art from debut illustrator Raul the Third recalls ballpoint-pen-and-Sharpie desk-drawn doodles, while the story is sketched with Spanish, inked with science facts, and colored with true friendship. With a glossary at the back to provide definitions for Spanish and science terms, this delightful book will educate and entertain in equal measure.

Gr 4 "Camper introduces readers to Lupe Impala, Flapjack Octopus, and Elirio Malaria, three friends who love working with cars and dream of having their own garage shop. One day they see an opportunity to achieve their goal—a car competition where the prize is a "carload of cash and a solid gold steering wheel." When they start working on a lowrider to prepare it for the competition,

an out-of-this world journey begins. Through anthropomorphic characters, the author narrates a tale of friendship, teamwork, and the passion for lowriding. She incorporates astronomy to this adventure, providing readers the opportunity to familiarize with terms from both worlds. Raúl the Third's colored pencil-and-marker illustrations effectively depict images from the lowriding subculture, while including references from Mexican pop culture, such as the iconic comedian Cantiflas and Chespirito's El Chavo del Ocho. The way he alternates among full-page artwork, spreads, and non-rectangular panels works well with the story and strongly supports its visual understanding. However, although it is true that some Latinos code-switch in their conversation, the use of Spanish words didn't feel organic to the story. There is also inconsistency in the use of accents, and footnotes that point readers to phrases and word meanings are explained as "nonsense words in Spanish," when that's not necessarily the case. *Lowriders in Space* fills a gap of Latino graphic novels for kids, and its quirky characters and illustrations have the potential to engage children. Let's hope that future installments will have a more accurate and natural use of Spanish. A helpful glossary of astronomy and lowriding terms is appended. âSujei Lugo, Somerville Public Library, MA

Like a Chitty-Chitty Bang Bang taking place in the southwest US (or is it northwest Mexico). Upbeat fantastical humor and imagery. The colorful, high-energy drawings keep the fantasy alive and driving forward. There is no surprise at the end, but it doesn't matter, these are like the day dreams of every kid as they tighten the bolts on their bicycle or hammer together two boards in the basement. "What if I could make this thing fly..."Seems at a level for older elementary school age to read themselves or younger elementary to have read to them. Or, jackpot, if your middle or high school-er to reads it to the younger kids of your posse. The spectacular drawing will keep even the youngest paying attention even if they don't understand all the words and ideas the first time through.

Bought this for my brother in law and he wrote back saying he loved it. He didn't expect to but did. :)

I did my best with the Spanish, but high school's not enough for me apparently. Hee hee. Ah well it was a good story. Very cute drawings and I wonder what's gonna happen next! Until then, HASTA LUEGO MI AMIGOS! TE AMO!

What a great story...very refreshing. The illustrator is definitely talented. The art has great flow and the characters are so cute! My nephew is going to really enjoy this book.

Such a fun story and beautifully illustrated! I especially love that the hero mechanic is a Latina woman. Very cool for Latina girls to see themselves represented in stories like these.

It is cool because I like cars and my mom always tells me about Lowriders! It is also educational because it has English and Spanish teaching children other languages.

Excellent read for my boys 9 and 7. They love the characters and the art pops in a colorful display of cosmic resonance. Yeah it's good.

Loved by all my students!
