## Customer Reviews

I used to be a distance runner but now I am a full 60lbs heavier (a bodybuilder) and running absolutely demolishes my knees for a day or two after. I have been looking to do some low impact cardio and I think that elliptical workouts might be just the thing! The beginning of the book lays out 4 different elliptical routines and the second half explains how to focus on different muscles while doing the routines, now for me the second part is irrelevant because no amount of elliptical training is going to do what benching 250 lbs can do but the beginning was good and the second half will be useful to women who want to build a little muscle mass

It was very useful reading as I often do my exercises on this machine. Now I know what other regimes I can use and how to train the better way to have the result. I was also surprised that I can also work on straightening of the spine with this machine, that is very good.

This gave me ideas to use on my own machine.

Practically no picture, just descriptions you cannot get what they mean!
