Critical Failures III (Caverns And Creatures Book 3)

Synopsis

Going back home was not exactly what Tim and the C&C gang expected. Trouble continues to follow them back to Gulf Coast Mississippi. Trouble... and a gnome... and an undead midget.

Customer Reviews

Once again Robert Bevan has cranked out a hot load of pure WIN. Honestly, he can't write these fast enough for me. Yes the humor is rude and crude and a ton of fun! The wacky shenanigans these poor gamers get into is ridiculous, but I would watch a movie or better yet a tv series of these guys religiously. So please, Netflix or HBO or even Dead Gentleman, get this author the recognition he deserves. Thankee Mr. Bevan for several more hours of entertainment.

But get ready for a few great S-words, like... Stacy (hello, nurse!), FIRE SWORD!, and Tim starring as Simba in a Cooper production of The Lion King. Critical Failures III brings us back on a merry

chase with our favorite dysfunctional protagonists as they attempt to reach Mordred. As always, there's more failure than success, but that doesn't stop our intrepid band of do-gooders! With a few new members added to the cast, and the growth and (surprising) development of some of the old members, CF III: A Storm of S-words does not disappoint. The same great humor all around in this volume, you'll once more catch yourself trying not to laugh uncontrollably on the tram or in the office. Yet another book from Robert Bevan that you just cannot put down. Now, if you'll excuse me, I have to pop Critical Failures I back open, and read them all again in eager anticipation of any future misadventures....

I am in serious trouble when I read this series - I start laughing out loud, spill food, pound the table and generally make a nuisance of myself in public as a result of being so engrossed in the content. The humor is ...well the best way I can put it is crude, witty, sarcastic and something that all of us at one point or another felt like saying or doing but were held back by societal conditioning. There has yet to be a book or short story in this series that I have put down once I started the first page. I savor every one of them like fine wine and try to extend the short stories (also can be picked up on kindle - a must read btw) until critical failures #4 come out. This beats Games of Thrones for me as a series - seriously wicked comedy in a fantasy setting. Please please release the next book!

If I could give this more stars I would. Although this is not the type of novel I typically read when fantasy-genre novels, but this series was amazing, entertaining, had surprisingly more depth than I would have at first thought, and, as a phrase, can be described as "a delightful romp through the fantastical land that is Mr. Bevan's mind". Over the course of the three (to-date) novels in the series I have grown to appreciate the characters and their growth and development, as a group and individually. Although I am not overly familiar with D&D and its associated culture, this is a fun glimpse at their world. The plot has plenty of twists and action to keep you reading through the pages, and once you pick up first book in the series you will be hooked and end up reading the rest! My only gripe with the series till now is that book four hasn't come out yet, but then again, cranking out novels is no easy task. Thank you for the great books Robert and I'm looking forward to number four!

At the end of Critical Failures II, I found myself wondering if this was going to be a short series. It seemed like the story had painted itself into a corner and things were going to wrap up quickly. Well, the good news is, it didn't. The great news is that at the end of this book, I still found myself wanting

more. When George R.R. Martin introduces a new character these days, everyone groans. When the Caverns and Creatures tale grows in the telling...let's just say it's going to be a bad day to be a half-orc's loincloth, but a good day for anyone who has a strong stomach and enjoys tabletop role-playing games.

More of the tale of folks sucked into a game of Caverns & Creatures, although much of this one takes place in our world, as the protagonists had a wizard teleport them home . . . still in their C&C character forms! They pursue the Cavern Master "Mordred" in a quest to retrieve the enchanted dice that sent them into the game, in hope of setting things to rights! There are more dick and fart jokes in this one than you can shake a 10' pole at, but if you liked the first 2 books, you'll probably like this one too!
