This last work of the well-known Senegalese scholar (1923-86) is a summation and expansion of his two previous volumes-- *Precolonial Black Africa* (1987) and *The African Origin of Civilization* (1974)--and offers a refined statement of his life's work, to prove the primacy of African culture by proving that ancient Egypt was a black society, first in many cultural achievements later claimed by the following Indo-Aryan cultures. To this end, Diop discusses the paleontology, sociology, anthropology, and intellectual history of the ancient Egyptians set against contemporaneous cultures and also the modern Wolofs. This is a fascinating and frustrating volume. The organization is patchy; one central section seems to have gone off-course into an apology for Marxist political theory; the translation stumbles badly, especially in the early chapters; and one feels that history is being stretched (a la Velikovsky) on the author's Procrustean bed of African genesis. But Diop's erudition is patent, his place in African letters is secure, and his major works should certainly be available. For academic and large public collections.-Jo-Ann D. This is a must have book for african american male\female or children. The great continent mother african has produced some of the best scholars in the past. Or even in the world this book has inspired me into so many ways it has changed my perspective on how perceive information on a educational/scholarly level. I had no idea that the anicent KMT people produce mathematics on a algebra level, and in modern society today we are still utilizing that same education systems that our people of KMT used. American is country that is build upon on Ancient Egyptians knowledge and as I continue to read more books by scholars, I never to misled by gibberish or retoric again.

Cheikh Anta Diop always has innovative topics and information that will make you want to read and then re-read again. He provides detailed info on various research topics with a massive amount of references to go by. I thoroughly enjoyed and shared this book with others.

If you really want to know the true beginnings of civilization on planet earth read this book. Diop was a true genius who died too soon, but the knowledge and insight he gave to us through his teachings, writings, and scientific research (radio carbon dating that discovered the ancient kings and queens of Egypt skin contained melanin) has proven where humanity began and just what race is responsible for the beginning of human history and many of the creations that we still are enjoying today. This book is provocative, insightful, and truthful, check the facts yourself, you may be surprised (if you didn't have previous knowledge of self) but not disappointed!

Must have for all black peoples. Keep this as your bible, Diop never fails us.

The first 200 pages or so are difficult reading, yet even they are sprinkled with fascinating highlights. The book's highly technical beginning, however, provides the groundwork for the mindblowing erudition that follows. If you are intellectually flaccid or enjoy shackles on your awareness, do not read this book.

This book is one of the great items to have in any ones library the needs to educate them selves on thethe African history and to educate their children, I will recommend this book to anyone interested in thehistory of the great African Land.

One of the best books written, no doubt about it but is difficult reading. It's no novel.

Arrived today (04/19/2017). Thx
