Customer Reviews

With her crisp writing and in-depth reporting, Vipond has created a terrific guide book on Alaska. --Cruise Critic
A gift-worthy guide to the ports. A gorgeous and strong cruise book. --Cruise Travel Magazine...
Anne Vipond goes beyond the standard cruise-guide fodder of ship and port descriptions. It's a comprehensive work. --Chicago Tribune

Veteran cruise writer Anne Vipond, author of several books on cruising, describes this destination with concise and helpful detail for passengers wanting to maximize their time at each port of call. Anne has written for many magazines and newspapers in North America. She has also written several books for Thomas Cook Publishing.

I know this book has gotten rave reviews. It is OK as a general resource for cruising Alaska with

good descriptions of the locations and history. If you are in the initial stages of researching where you want to go, it is an excellent way to learn the basics. The reason I gave only 4 stars was because I wanted more recommendations on what to see and do. I was looking for guidance and not just descriptions.

I used this book when I went to Alaska, and I liked it so much that I bought it for two friends that were taking Alaskan cruises. It is informative, and a "must read" before cruising to Alaska.

Great solid book on the Alaska ventures by cruise ship. Details about the different lines, the ships, and the ports of call. We used ours for extra info on a recent cruise and found it easy to use and useful.

I ordered a variety of books - we were first time cruisers and this was our first Alaska visit. This was our favorite of them all!

Very helpful on our recent trip causing the Inside Passage

Very helpful on our trip to Alaska.

This book gave many suggestions of things to do or places to see while in Alaska! We used it for researching what cruise excursions we want to go on.

Trip is planned for the fall. Lots of good tips in this book. Guess I can't really be a good judge of how helpful the book is til I get back. But for now, it looks promising.
