I bought "A City Through Time" for a six year old. I was afraid that it was too advanced for his age when I received it, but his mother says it is a hit. :) They go through it a page at a time with him and he soaks it up like a sponge. Great book. An excellent way to introduce a child to the concepts of time and history. The illustrations are fascinating and entertaining...even an adult will learn things here. Probably more suited to an eight or nine year old ideally.

My kids love this book. The first week after it arrived they poured over it for hours checking out each of the pictures.

I love this book. Written by Philip Steele, the story takes you on a journey from the Stone Age and shows you the progression of a city over time to the Millennium Tower in the year 2005. The illustrations by Steve Noon are so detailed and gorgeous. Each era shows cut-aways of the various architectural structures complete with labels and definitions on each page. There is also a glossary at the end of the book so it's educational at the same time as being a fun feast for the eyes. Adults will be as fascinated by this book as the children they are reading it with.

A story of a city from Ancient Colony to a vast Metropolis. Fantastic pictures with lots of details.

Love these kinds of books. Fascinating. Really enjoy reading it with my little kids. In these age of ipads and tablets, there is still something about flipping through paper books with good illustrations.

Great book for my grandson.

Excellent visual history reference. We use this and "A Street Through Time" constantly in our homeschool history studies.

my granddaughter loves this book.
