## Customer Reviews

The first International Symposium on Primo Vascular System 2010 (ISPS 2010) with special topics on cancer and regeneration was held in Jecheon, Korea during September 17-18, 2010. The symposium dealt with the past findings, current status, and future prospect of the PVS research in the context of cutting-edge investigation in oriental and occidental medicine, molecular biology, and biophysics. This proceedings volume explores the first international opportunity to exchange the research results on PVS among multi-disciplinary experts. New study results have better revealed the functional aspects of PVS, including its roles in the areas of regenerative medicine and cancer. These research results have also suggested the extensive roles of PVS in humans, potentially changing the entire paradigm of medicine. The Primo Vascular System is a timely volume that will help accelerate many disciplines as it delves into this newly researched system.

From Troy Ottwell, Cold Laser Therapist, Dallas, Texas May 2012 This "new" cutting edge medical advance by a Korean medical doctor should be making headlines in all the anatomy and related

medical journals..something new,that western science has missed.The implications of this Primo system for cold laser therapy/light therapy are endless.This is a must read for anyone interested in medical research, or the alternative therapy community.Troy in Texas
