HIRE! The Job-Hunting/Career-Planning Guide, 4e Michael Stebbleton, University of Minnesota, Twin Cities Michael Henle, The College of William and Mary Career choice is not a single event—it's a life-long process! For a student taking a career development course, or a career seeker actively looking for placement the fourth edition of **Hired!** remains a practical, life-career planning guide designed to reach a variety of audiences. However, unlike other textbooks, **Hired!** focuses on helping students develop an ongoing, flexible portfolio about

themselves and their work--to prepare them for satisfying and productive lives in our ever-changing world. The writing activities encourage students to take a proactive role in creating their own career philosophy and their futures. The workbook approach and step-by-step exercises keep students focused on the critical issues--self-developed goals and action plans--and the execution of those plans. At the same time, various goal-setting and planning techniques will help job seekers overcome career obstacles and increase the likelihood of career success. New to this edition The theme of goal setting is woven throughout the book. The role of online social networking in the career planning, networking, and job search process is addressed. The financial planning chapter (ch. 12) has been expanded and focuses on practical issues faced by traditional and nontraditional students. Each chapter now includes:

- 1) A profile of a traditional and non-traditional student, providing students a profile of someone to whom they can relate.
- 2) A "Do You Measure Up?" or "Are You Prepared?" goal-setting activity. These features emphasize specific self-assessment and goal-setting activities that the student completes for implementation in their plan.
- 3) A "What Employers Want" workplace information feature. The workplace information helps students develop greater understanding of the workplace and keys to success in their career plan, job search or workplace activities. Start strong. Finish stronger.

Great

I needed this book for school and it was exactly as described. I have nothing bad to say about this.

Good tool

Pages were torn out, had content but a large number of the exercises (which were needed for class) were missing and so another copy was needed.

Publishers make so much money off students.
