How To Draw People (Dover How To Draw)

Synopsis

By joining circles, ovals, rectangles, cylinders, and other common shapes, even the budding artist can easily create 30 different characters — a fireman, a drummer, a mailman, a cowboy, an astronaut, a roller-skating girl, a boy on a swing, and more. Simple directions, step-by-step illustrations, and blank practice pages make it even easier. You can color the pictures when you are done — it's a fun-filled way to teach art to young children or a beginner that enjoys drawing.

Barbara Soloff Levy has created over two dozen "How to Draw" guides for Dover, plus many other activity books. Since retiring from her job as an elementary school art teacher, she devotes much of her time thinking up new ideas for this popular series.

This is a very simple, step-by-step guide on how to draw cartoon people. I bought it for my 5 year-old daughter for her birthday and I will write more when she opens it and tries it out. But paging through it, I can tell you it is for beginners and for the very young. It is not for people who already have a lot of experience with drawing or for people who want to draw realistic people or faces. But I think it is very good for little kids who want to get better at drawing and who get frustrated easily.

Even I am learning how to draw with this easy to follow book. Comes with step by step instructions on how to draw people with a practice page right next to it. This book is a lot of fun for kids!

My 6yo loves this book! She loves to draw but could definitely use some instruction. This books makes it easy for her to follow along and learn new techniques and steps for her work.

pretty awesome lil book i bought for my kids but i actually enjoy it myself! i cant draw very well so this helps my people actually look like people love the extra sheet you can see through enough to trace! awesome idea!

Contrary to the blurb and some of the reviews describing the book, the book does not actually use simple shapes such as squares, ovals, circles (other than the head) and rectangles to draw people. So the child, for example, doesn't grasp the most basic point--that people consist of a series of ovals with joints at each thin end; indeed the hip drawing style often implies that people are fat at the joints. The book does, however, do a great job of getting the child to draw people with mass rather than as stick figures.

I bought this for my 6 year old grandson. He was using it right away and able to follow the illustrations. The step by step illustrations made it easy for him to see how he could "build" up to a complete picture.

This is such a great book. Our 5 year old copied a drawing example from the book with little help. She thinks it is neat to learn how to draw different characters.

This is perfect for beginners. Very much a 70s 80s vibe which is something I can appreciate, not sure if a trendy teen would though.
