Natural Gas Hydrates, Third Edition: A Guide For Engineers

Synopsis

Rarely covered in formal engineering courses, natural gas hydrates are a common problem and real-life danger for engineers worldwide. Updated and more practical than ever, *Natural Gas Hydrates, Third Edition* helps managers and engineers get up to speed on all the most common hydrate types, how to forecast when they will appear, and safely mitigate their removal. Known for being highly flammable, gas hydrates are a preventable threat that can cost millions of dollars in damage, as well as take the lives of workers and engineers on the rig. The third edition of *Natural Gas Hydrates* is enhanced with today's more complex yet practical utilization needs including: New hydrate types and formers, including mercaptans and other sulfur compounds Vital information on how to handle hydrate formation in the wellbore, useful information in light of the Macondo explosion and resulting oil spill More detailed phase diagrams, such as ternary systems, as well as more relevant multicomponent mixtures Quantifiably measure the conditions that make hydrates possible and mitigate the right equipment correctly Predict and examine the conditions at which hydrates form with simple and complex calculation exercises Gain knowledge and review lessons learned from new real-world case studies and examples, covering capital costs, dehydration, and new computer methods

Book Information

Series: Natural Gas Hydrates

Hardcover: 340 pages

Publisher: Gulf Professional Publishing; 3 edition (July 8, 2014)

Language: English

ISBN-10: 0128000740

ISBN-13: 978-0128000748

Product Dimensions: 6.3 x 0.8 x 9.3 inches

Shipping Weight: 1.7 pounds (View shipping rates and policies)

Best Sellers Rank: #1,911,413 in Books (See Top 100 in Books) #64 in [Books > Engineering & Transportation > Engineering > Energy Production & Extraction > Fossil Fuels > Natural Gas](#) #178 in [Books > Engineering & Transportation > Engineering > Energy Production & Extraction > Drilling Procedures](#) #540 in [Books > Engineering & Transportation > Engineering > Energy Production & Extraction > Fossil Fuels > Petroleum](#)

Customer Reviews

John Carroll is currently Director, Geostorage Processing Engineering for Gas Liquids Engineering, Ltd. in Calgary. With more than 20 years of experience, he supports other engineers with software problems and provides information involving fluid properties, hydrates and phase equilibria. Prior to that, he has worked for Honeywell, University of Alberta as a seasonal lecturer, and Amoco Canada as a Petroleum Engineer. John has published a couple of books, sits on three editorial advisory boards, and he has authored/co-authored more than 60 papers. He has trained many engineers on natural gas throughout the world, and is a member of several associations including SPE, AIChE, and GPAC. John earned a Bachelor of Science (with Distinction) and a Doctorate of Philosophy, both in Chemical Engineering from the University of Alberta. He is a registered professional engineer in the province of Alberta and New Brunswick, Canada.
