Exercise For Frail Elders-2nd Edition

Synopsis

As the older adult population increases, so does the demand for fitness professionals who understand the capabilities and special needs of seniors with illnesses, disabilities, chronic disorders, and sedentary lifestyles. *Exercise for Frail Elders, Second Edition*, is the only exercise fitness guidebook that focuses on working with frail elders and adults with special conditions. It is an invaluable resource for improving functional fitness, maintaining aspects of independent living, and enhancing quality of life. With *Exercise for Frail Elders, Second Edition*, readers will gain a deeper understanding of 14 medical conditions common to older adults, how these conditions may affect participants' ability to perform activities of daily living, and what exercises can help them maintain and increase functional fitness. This book focuses on special needs stemming from conditions including arthritis, cardiovascular disease, diabetes, hypertension, orthopedic issues, osteoporosis, Parkinson's disease, and Alzheimer's disease. The updated second edition provides a broader focus on balance, a critical component of any functional fitness program, to aid in designing classes that incorporate various stability exercises. Exercises that provide significant benefits to balance are indicated with a symbol to ensure effective program design. Additional features of this edition include the following:

- Learning objectives at the beginning and review questions at the conclusion of each chapter provide a framework for understanding.
- Reproducible forms provide readers with easy-to-use appraisals, questionnaires, and exercise logs for evaluating clients.
- Checklists and reference charts highlight key areas of concern and consider specific needs when planning functional fitness programs for clients.
- Guidelines and safety precautions for special conditions and how they apply to range-of-motion exercises, resistance training, aerobic exercise, and stretching have been updated.
- Specific exercise instructions, including variations and progression options, show professionals how to add interest and challenge for participants.
- Suggested resources encourage exercise leaders to continue their education.

To enhance learning and program development, the text is divided into two parts. Part I covers planning an exercise program for frail elders or adults with special needs, including knowing the needs of class participants, motivating students to exercise, and keeping them safe while participating. It also offers strategies for success, including basic class structure creating a sense of fun and community. Part II covers implementation of a successful program, including course design, warm-up and cool-down, and exercises for range of motion, resistance training, aerobic training, and stretching, with their variations. Over 150 photos illustrate safe and effective execution of the exercises. *Exercise for Frail Elders, Second Edition*, is an easy-to-follow resource for working with elderly individuals in assisted living and nursing homes, rehabilitation

facilities, hospitals, day centers, senior centers, recreation and community centers, and home health care environments. This unique guide has the hands-on information necessary for creating safe and effective exercise programs and understanding medical disorders, safety precautions for specific disorders, and implications for exercise. Readers will learn to design and teach a dynamic fitness program for older adultsâand keep it fun, safe, and functionalâwith *Exercise for Frail Elders*.

Customer Reviews

âThis book is unique; there is no other like it. It focuses on a distinct population of people and does a great job considering all facets of the topic. In addition, the authors cite relevant, peer-reviewed literature to support their recommendations and exercise prescriptions.â

Doodyâs Book Review (5 star review) --This text refers to an out of print or unavailable edition of this title.

Elizabeth (Betsy) Best-Martini, MS, CTRS, is a certified recreational therapist specializing in the field of fitness, aging, wellness, and long-term care. Best-Martini is the owner of Recreation Consultation, a firm that provides training and recreational therapy consultation to retirement communities, skilled nursing settings, subacute settings, and residential and assisted care facilities in northern California. Her practice also includes Fit For Life one-to-one personal training for adults and older adults. Best-Martini specializes in working with adults with special needs and brings more than 30 years as a rehabilitation therapist to this work. In addition to consulting, she lectures and provides training across the United States and in Canada. She also teaches a weekly seated strength training class

in an assisted living setting. Best-Martini is an instructor at the College of Marin in Kentfield, California, where she teaches courses in strength, flexibility, and balance for adults and older adults. She trains new fitness instructors in the Exercise for Adults with Special Needs Fitness Instructor Training and Certification course through the American Senior Fitness Association. In addition, she facilitates the Activity Coordinator Training course, which certifies students through the Department of Public Health to become activity coordinators working with older adults and frail elders. She has authored two other texts, Long-Term Care for Activity Professionals, Social Services Professionals, and Recreational Therapists, Sixth Edition, and Quality Assurance for Activity Programs.

Best-Martini also writes a column focusing on fitness and wellness programs for older adults in Creative Forecasting, a national newsletter for activity professionals and recreational therapists. In 2006 and 2008, Best-Martini received the American Therapeutic Recreation Association (ATRA) Member of the Year Award. She was awarded the 1998 Distinguished Merit Award from the Northern California Council of Activity Coordinators (NCCAC) and the Pete Croughan Award for her volunteer efforts with the nonprofit organization, Love Is The Answer (LITA). She also served on the Visionary Advisory Board for the International Council on Active Aging (ICAA). In her free time, Best-Martini can be found gardening, hiking, exercising, and spending time with her husband, family, and many pets. She lives in Fairfax, California.

Kim A. Jones-DiGenova, MA, received her master's degree in physical education (exercise physiology) and the Distinguished Achievement in a Major Field Award from San Francisco State University. She is a physical education instructor at the College of Marin in Kentfield, California, where she teaches courses on strength and fitness training for older adults. She also serves as a health and fitness consultant and personal trainer in the San Francisco and San Rafael metropolitan areas. Jones-DiGenova has been working in the fitness field since 1971. She is an ACSM-certified health fitness specialist; SFA-certified senior personal trainer, senior fitness instructor, and long-term care fitness leader; Arthritis Foundation exercise program instructor; and YMCA strength training instructor. She is the Northern California academic administrator for the American Senior Fitness Association and has developed and implemented resistance training programs in several convalescent, retirement, and senior facilities throughout California. Jones-DiGenova has also assisted handicapped adults with weight training, aerobic exercise, and stress reduction at the Recreation Center for the Handicapped in San Francisco. In addition to her work on Exercise for Frail Elders, Jones-DiGenova is a regular contributor to national and local newsletters. Jones-DiGenova resides in Novato, California. She enjoys spending time with family and friends and reading. She stays active by walking, hiking, swimming, weight training, and practicing yoga. She has swum from the Golden Gate Bridge to the

San FranciscoâOakland Bay Bridge and has successfully escaped from Alcatraz many times. Janie Clark, MA, is president of the American Senior Fitness Association (SFA), the international organization for fitness professionals who serve older adults. She earned a masterâs degree in exercise physiology and wellness management from the University of Central Florida, with an emphasis in older adult health and fitness. Clark is a contributing author of Physical Activity Instruction of Older Adults and Exercise for Older Adults: ACE's Guide for Fitness Professionals. She is the author of Brain Fitness for Older Adults: How to Incorporate Cognitive Fitness Into Physical Activity Programming; Quality-of-Life Fitness; Seniorcise: A Simple Guide to Fitness for the Elderly and Disabled; Full Life Fitness: A Complete Exercise Program for Mature Adults; and Exercise Programming for Older Adults. She has authored hundreds of articles for periodicals, including the Journal of Aging and Physical Activity; Activity, Adaptation & Aging Journal; ACE Certified News; and Modern Maturity. Janie served on the National AFib Support Team sponsored by Sanofi-Aventis pharmaceutical corporation to provide patients and health care professionals with current information on atrial fibrillation. She also served as a reviewer for the LifeSpan project, which developed functional fitness tests for older adults, and as a member of the Coalition to Develop National Curriculum Standards for Senior Fitness Professionals. Clark resides in Florida with her husband, son, and ever-growing menagerie of cats, dogs, and other furry creatures.

Wonderful resource in helping my elderly father-in-law who is 86 and has multiple health issues that keep him too sedentary. There are lots of very good images and exercises that have helped him learn some good exercises to help him regain some balance, flexibility and strength. I am so glad that I was able find this as a used book on .

I am a therapist and teach therapy and we always need exercises for this growing population. Even if we have learned many of these in therapy school, it's a great refresher and it has photos for patients, students and for our elderly mom, dad, partners, grandparents, single elders and can help us baby boomers.

easy to follow exercises and helpful safety precautions. Elizabeth Martini is very knowledgeable and experienced with frail senior population thanks

Item is as expected...thanks

I highly recommend this book. I am a PTA and feel this book is such a great source of information for many professionals that treat and work with the geriatric population.

I bought this for use in my Zumba Gold classes. It offers a ton of helpful advice and good illustrations. Definitely worth it for anyone working with the older population.

Must-have resource for elders or anyone working or living with frail elders.

It was helpful in getting a exercise program going.
