Customer Reviews

I have traveled throughout the US and several other countries. This map/brochure was one of the most user-friendly, information packed piece of paper for a massive geographical area I've had the privilege to use. I got several copies and have given them to friends and the map sells the area. GREAT JOB!!!! --Paul B. I think the map is terrific, in fact, the best of the state maps I've used. The map has enhanced my trip planning to include many places I had not known of before I got the map. --Don M. The 10 day trip we took visiting southern Utah and northern Arizona was one of the most wonderful experiences of our lives. The map was invaluable in the planning for the trip, during the trip and after the trip in showing our friends. --E. Gustafson I think the map is terrific, in fact, the best of the state maps I've used. The map has enhanced my trip planning to include many places I had not known of before I got the map. --Don M. Utah.com National Parks Map & Guide was produced to help travelers plan the perfect trip to explore the famous icons and also to help seek out the lesser-known points of interest.

I bought this map thinking that it might offer more detail than a common AAA map or the free maps that are handed out at visitor centers. It does not. In fact, it provides far less detail and is quite useless for any serious trip planning. Very few roads are displayed on the maps, leaving out many secondary roads completely. As to the individual national park maps provided on the back they also show very little detail. If you are planning to go to the canyon land areas of the southwest buy a decent guide to those national parks, copy the detailed maps each park provides on the internet, and stop by AAA for your state maps. Detailed state maps can also be obtained for free by writing to the states you plan to visit. You will be much better prepared to enjoy your trip with those maps.

If you've got state maps of Utah, Arizona and Colorado, save your money and don't buy this. It's ok as a quick reference to the parks, distances between them, etc., but that's about it. The roads listed are only the main ones, there's no real detail to the map. Again, it's good as a reference to where everything is, but you'll need more maps to really explore these areas.

If you are going from park to park this is a good sturdy map. It provided the overview that I wanted to supplement my GPS.

Ok

This map looks very helpfull because mentioned area is there in detail. (from Las Vegas to Salt Lake City).

Wow. This is an expensive map for what you get. Can't say how useful it is since we decided to go

somewhere else instead. I have it on hand for a future trip, but it seems like a map you might pick up for free, though it is easy to fold back up and seems a bit more durable than a free map.

Great map and it is made of high quality paper! I have it hanging on the wall after I returned.

Great overall map of Utah that came in handy when visiting the national parks there. Just, fyi, don't expect much detail for each individual park though.
