Pit Firing Ceramics: Modern Methods, Ancient Traditions

Synopsis

When digging for clues about an ancient society's culture, nothing is more valuable to an archaeologist than ceramic remnants. Dawn Whitehand explains why. Her text is the first to comprehensively explore the complex nature of pit firing based on historical evidence and the artistic perspectives of contemporary ceramicists. Many specialist texts discuss ceramics from an artistic, craft-based, anthropological, archaeological, or historical viewpoint. This book draws information from all these sources and presents it in an informative and accessible manner. Included is a historical chapter, a how-to chapter, and a series of artist profiles that showcase the pit fired ceramics of contemporary practitioners. The book contains detailed photographs of the process and a glossary for those who wish to further explore pit firing and ceramics. It will appeal to everyone from the novice ceramicist to the serious art historian and collector.

Dawn Whitehand has been a practicing ceramic artist for approximately twelve years during which time she has exhibited widely in her native Australia and internationally. Her artwork is held in several public and private collections.

Really good information surrounding the beginnings of pit firing. Really liked the "Story Pots" and also liked the different ways people do their firing. A wealth of knowledge can be found in this book if pit firing is something you're interested in. The research about how pit firing started and evolved

Whether you are a seasoned pro or a beginner in pit firing you will gain much from this book, as I did. As one of the featured artists I have to say how much I gained from the other artists and processes they use.
