Synopsis

If you, or someone you love, suffer from Meniereâ€™s disease, there is so much hope! Glenn Schweitzer was 24 years old and in his senior year of college when an attack of violent vertigo changed his life forever. He was diagnosed with Meniereâ€™s disease, a complex and debilitating chronic illness that causes vertigo, tinnitus, ear pressure, and progressive hearing loss. To this day, there is still no cure or even an understanding of what causes it. But he eventually found ways to cope and was able to take back his health, piece by piece. Through Glennâ€™s terrifying, yet inspiring story, and with dozens of specific actionable techniques, you will be able to take back control of your life, too. You will be able to face your Meniereâ€™s disease without fear. You will learn to manage your symptoms and live in harmony with your disease. And most importantly of all, you will learn to thrive again. No matter how long you have suffered, this book will help you to get better. Meniereâ€™s disease will not define you. It cannot and will not ever be bigger than your dreams.

Customer Reviews

All people suffering from Ménière's Disease as well as their family and friends should read this book! There is so little understanding of this disease. Even our Doctors don't tell us what to expect. My ENT put me on diuretic and 1000 mg sodium diet and I already had very low blood pressure. That did not work out. It had been a juggling act for me with the Low blood pressure problem and the diuretic. Not until this Book did I feel I found an understanding friend. Glenn Schweitzer's book told me what to expect better than any medical office. He helped me realize my future is not dark and I am not alone in this. He helped motivate me to exercise and improve my physical health. He shared a symptom trigger tracking log (on his blog) to help me see what recurrent habits I may have with my diet and daily life that may be potential triggers. I am learning as I go and it is helping me regain a sense of some control in this. My symptoms are better. His recommendation of musicians' earplugs to me helped my hyper-sensitive ears (the sound system was sending me into vertigo near drop attacks at my church) and now I thankfully can listen to the music at church and go to concerts and movies. They help my ears tolerate without sound triggered panic & vertigo in the open echoing places and chaotic noisy environments. I have tried a product he recommended for my awful dementia-like Brain Fog, Alpha Brain and it has helped me tremendously. I was forgetting names of friends one morning at church, and trouble thinking at all and after taking the supplement my fog lifted and brain worked much better that afternoon. He gives us new weapons to try to fight this thing like the concept of "Flow States". I am in agreement with him that our creativity and passions can decrease our symptoms by stimulating our brains. I have been in a "Flow State" making crafts for my Church Christmas Bazaar. I was obsessed to the point I would forget to eat and couldn't stop working on the craft projects until late at night, even waking up middle of the night with new craft ideas right and left. I was Painting snowmen and other things on scrap wood and making lighted gourd nativities. I was Obsessed and driven on this "mission" from September until December 2016 and subsequently my symptoms subsided the entire time and I did not think I had MD any more. After my craft Bazaar was finished and my "work" was done my symptoms came back. So I see hope, possibilities and purpose for my life in that and am thankful. I am thankful for Glen Schweitzer, for caring about us enough to share these things he has learned in his experience with his disease. He gives us new hope. He urges us to seek our Passions. He empowers us with new ways to fight this awful disease. I'm looking forward to reading his other book. I went from feeling hopelessly beaten to finding my joy in my life again. I encourage you all to read it. (A picture of me and my crafts from my flow state attached)

This book has helped me so much on my journey with Meniere's. I've read it two times and have highlighted all the important pieces to refer back to. Glenn is amazing at keeping it positive and helping to realize there is hope! I also have his book Rewiring Tinnitus. I've also read this a few times and am just as happy.
