## Customer Reviews

John Patten (Pat) Guthrie, AIA is principal of John Pat Guthrie Architects, Inc. A licensed architect in 13 states, he is the author of McGraw-Hill's Cross Check: Integrating Building Systems and Working Drawings.

If you're looking for a simple quick reference, this is the book for you. For its size, it is packed with useful information. Working on projects, I find myself checking it multiple times a day - there's just

so much in it that's useful to me as an architecture student, whether I'm working on class assignments or personal projects.

I'm a licensed architect that left the job market for a few years to care for my kids. This book really help refresh my memory without a whole lot to carry around. For anything a lot more extensive, you do need additional references. That is usually the case anyway.

I read it as supplement to prepare the ARE exam. Good information for beginner who has not enough experience in this field.

Easy to ready and handy

not much different than previous. disappointing. code not up to date as well. wait for new version. save your money

If your an architect or becoming one, or within the field, this is a must have! Simply if you don't have it, you should have ordered it yesterday period

I wish there was a preview of the digital version. I found out the expensive way that this book is not as readable, and it is hard to navigate as well...I want my money back!

As an architect this is a great handbook to keep on your desk. I purchased this copy for a friend starting his AREs
