Month By Month Gardening In The Deserts Of Nevada

Synopsis

The Month-By-Month series is the perfect companion to take the guesswork out of gardening. With this book, you'll know what to do each month to have gardening success all year. Written by authors in your state, the information is tailored to the issues that affect your garden the most. When is the best time to plant trees and shrubs? Should I fertilize my lawn now? Is it time to prune my roses? What should I be doing in my garden this month? You'll find the answers to these questions and much more inside. This easy-to-use book highlights each of the ten major plant categories using a monthly format. It guides you through each month of the year, telling you exactly what your garden needs. It is like having an expert in the garden with you all year long. Valuable hints are located throughout the book, and beautiful photographs will inspire you. Written just for gardeners where you live, you can be confident that the information is right for you-and your garden will show it.

There are all kinds of books out there that have desert gardening, but nothing that I found interesting. Since I live in Las Vegas, I bought this book and love it. It tells me everything I need to know about gardening here.

This is a great book for me living and playing in Clark County, Nevada, I use this book all the time to help me understand the desert landscape.

Arrived promptly. Really like finding a book about the Las Vegas area.

It's a decent book... The problem is, it doesn't specify that it is specific to Southern NV... Specifically Las Vegas and surrounding. So in Northern NV. No such luck.

Great book for our area here in Bullhead City, AZ. Our master gardeners recommended it from your web site. Thanks

Excellent service and book

I live in Las Vegas and bought this book at the Springs Preserve. I am originally from NorCal and miss being able to have a garden with plenty of color. After 8 years of living in Vegas I have tried to

plant everything only to see it die. The month by month was nice it told me when to do the plantings and most importantly when to fertilize and when to prune. Its a nice tool and allthough I will never have a NorCal garden in Vegas I can at least grow a few things and they will not die. Because of this book I am thinking about getting rid of my backyard grass and trying to grow some more desert friendly plants. Also for the Vegas gardner you might try Nevada Gardner by Linn Mills.

I purchased this book in hopes that it would simplify my gardening. Unfortunately, it is written only for those that live in Southern Nevada. It is of no use to the other 85% of the state - which is desert too. Anyway, it may be a five star book for those living in Clark County but I couldn't rate it more than two because it is of no use to me and its title was misleading leaving me a little bitter. In all fairness, giving it a star rating of any kind is unfair of me. I just want to make sure nobody else accidentally buys this.
