Molecular Recognition Mechanisms

Synopsis

'Molecular Recognition Mechanisms' is a modern approach to the study of the molecular basis of interactions between chemical and biological systems. Compiled by some of France's most eminent specialists in the field, this book adopts a multidisciplinary point of view in describing and explaining the complex subject of biological macromolecules (DNA, antibodies, receptors, enzymes, cell membranes) and their interaction with smaller molecules, both natural and synthetic.

Book Information

Hardcover: 285 pages

Publisher: Wiley-VCH; 1 edition (August 6, 1991)

Language: English

ISBN-10: 0471187852

ISBN-13: 978-0471187851

Product Dimensions: 6.4 x 0.8 x 9.5 inches

Shipping Weight: 1.4 pounds (View shipping rates and policies)

Average Customer Review: 3.0 out of 5 stars 1 customer review

Best Sellers Rank: #18,557,125 in Books (See Top 100 in Books) #80 in Books > Medical Books > Pharmacology > Molecular #28215 in Books > Engineering & Transportation > Engineering > Bioengineering > Biochemistry #82641 in Books > Textbooks > Science & Mathematics > Biology & Life Sciences

Customer Reviews

Text: English (translation) Original Language: French --This text refers to an out of print or unavailable edition of this title.

would purchase again. fast shipping. It cuts slices as thick or as thin as I want with no crumbs-a nice clean cut. I am completely satisfied with it and am happy to have a slot in my product block that it just fits in. SINDY very love it , perfect.
