## Customer Reviews

"Far and away [among] the best (and most beautiful) maps of the islands available today."

Nice well detailed map of O'ahu. Reasonable detail on the map with a few mini maps for certain areas (Honolulu, Kaneohe, and Kahala Head). Would be great for vacationing, but since we live here I really want something with more detail (street names, areas and neighborhoods).

This map gives a new (or old) local or a visitor an excellent sense of the entire island. Internet maps on your cell phone can get you where you want to go, but you might not know what you have been close to and missed seeing as you were driving to a destination. Sights, beaches, towns and historical places are all well marked. A great resource.

Excellent Product! Excellent service! Thank you!

It does show the whole island and some details of Honolulu, Kaneohe, and Kahala Head areas but

hardly any street names. No smaller roads are on there either. It's not detailed at all with roads but does have points of interest. Don't count on using this map for off the beaten path adventures.

The problem with a GPS is that it will take you where you know where you want to go, but it doesn't tell you what is just next door that you don't know about. And often a GPS will want to take you the wrong route because it is stupid. And it won't account for the surf competition that is on, or the backroad that will take you home 10 miles shorter, but because it isn't a highway, it will ignore the route. That is why you need a good map. This is one.

I like this map - I like the whole series for the islands. The topography is well laid out so it makes it easy to locate the town or street you need. Planning a route is easy. Folded size is the same as normal street maps you have in your vehicle.

Nice map for driving with a lot of outlined detail. Highlights many interesting destinations including beaches. I do however wish these maps were more durable. They seem to rip at the creases with very little wear.

We traveled around the island of Oahu and the map was very helpful. The map was a little help in Wikipiki and Honolulu but the best map for the cities is to use your phone for Google maps.
