TouchThinkLearn: Vehicles

Synopsis

Featuring spreads each with raised shaped objects that fit into scooped cutouts on their opposite page, these two new TouchThinkLearn books offer the youngest learners an irresistible opportunity to explore their universe in a hands-on, multisensory way. Seeing the image, tracing its shape, saying its name: these modes of perception combine in a dynamic way to stimulate understanding of essential concepts. Discover and experience a train by tracing the raised railcar on one side and feeling the excavated shape of the track on the other! Clusters of related words on each spread offer parents and children a springboard for further conversations to encourage the language skills so crucial to later successful learning. In a format unlike any other, these groundbreaking books translate abstract thought into tangible knowledge.

Book Information

Series: Touch Think Learn

Board book: 22 pages

Publisher: Chronicle Books; Ina Brdbk edition (August 4, 2015)

Language: English

ISBN-10: 1452145164

Customer Reviews

"A rewarding experience for adults and tots alike."--Kirkus Reviews, starred review
"An instant favorite."--Booklist

Xavier Deneux studied at Beaux-Arts de Paris. He has worked as a graphic artist, creating posters and decorations for various industries, and has illustrated more than forty children's books. He lives and works in Paris, France.

My one year old is obsessed with the think touch learn series. These are some of the only books he goes to on his own. The illustrations are bright, simple and colorful. We own them all, these new additions are no exception and they include more text as talking points for the illustrations.

I bought this book for my 9-month old son, and he immediately loved it. The colors, the cut outs, and textures keep him interested in each page even at 10-months now. He has a lot of books to choose from, but always goes for this one. We read/talk through each page/act out the vehicles before every nap. He laughs on the last page when I put my hand in the air and say "Blast offfffff!!!!" with the little rocketship. This book is a treasure, we will be getting more TouchThinkLearn books, they're very durable, engaging, and worth the investment.

These are excellent books, especially for children who don't like to sit still, or who are very tactile and hands-on. The pages and 3-D images are extremely durable, so my very rough little boy can't damage the books.

Purchased as gift, Am sure child will love it, I did!

AWESOME book!

One of the books that's very well-made and would be loved by any toddler. Especially boys! The embossed vehicles are very catchy and my little one loves to touch and feel them.

My daughter LOVES these books. They are raised and so she can feel them. They are very well constructed and simply beautiful with a clean design. Easy to flip pages too. Highly recommended for babies/toddlers and for gifts!

I found this book by chance, and I love love love how it's made, I love the design and the words it contains. It's smart and pretty and totally keeps my toddler interested :)
