After acceptance to Cornell University, he began an elite test-prep and admissions consulting company, called StudyHall (StudyHall.com). If you are applying to the best colleges and universities, you need to read this book. Our daughter was applying to Harvard, Stanford, Cornell, Princeton, and Yale University. After reading this guide,

we learned how to not only prepare for the SAT and ACT but what types of things admissions officers want to see on her application. The entire application process is much clearer now and the good news is she got into most of the Ivy League Schools listed above.... and has decided on attending Harvard University. This is a superb Ivy League admissions review! I even think it could help several of my friends as a detailed Ivy League school review too.

A really helpful book explaining in detail the ways to prepare for the admissions process to achieve the best results.

Nice addition for those looking into BS but have few other resources. Gives good ideas but the price was a little high.

I especially like the listing of High School Guidance Departments. It was a very useful perspective.

Best book on college admissions and Ivy League schools there is out there. Enjoyed reading about how to get accepted to top universities like Harvard, Yale, MIT, Stanford and a bunch more top schools. Here are some highlights I enjoyed:- Interesting concept about SAT and ACT scores and how admissions offices are considering these two scores equally now.- Gives examples of admissions essays and what you should write if you want your essays to stand out in the Common Application process.- Insightful tips on how sports and athletic recruiting matter and a candid discussion on the perceived Alumni advantage.- Tells reader how many APs and extracurricular activities matter for admissions.- Acceptances to top colleges happen when you build a personal motif.- How to prep for your admissions interview Overall I would rate this book on colleges and admissions 5 stars and recommend parents read so they can see an insider's secrets to admissions.

If you are the parent of a child whom you are considering sending away to boarding school you owe it to that child to go to boardingschoolsurvivors.co.uk and/or look up "boarding school syndrome" on Google. There is growing and convincing evidence that sending children away from their families to boarding school, and especially children under the age of 13, can do lasting psychological damage. How do I know? I am one of those damaged children still struggling with issues of trust and intimacy at the age of 50. The schools deny that there is a problem, saying that they are much pleasanter places than they used to be, but it is the separation of young children from their families

that does the damage. Also, many boarding school survivors are loath to admit to their problems, but their spouses or ex-spouses will confirm the symptoms.
