## Customer Reviews

A third generation tradesperson, Cauldwell is both a master electrician and master plumber. Cauldwell has an A.A.S. degree in Electronic Engineering and his books "Wiring a House" and "Inspecting a House" are popular industry standards. He is also the author of "For Pros by Pros: Plumbing."

This book has strengths and weaknesses. Lots of good info and photos on building a plumbing system in a house. Apparently the house is half in the country and half in the city. Paradoxically, the

author spends over forty pages on wells, pumps, pressure tanks and well-water supply system piping, but not one page on septic systems, cesspools, leach lines, or graywater systems. Go figure. The other void I found was zero information on cleanouts. The sub-title is a puzzle: For Pros By Pros. "For Pros" implies that the book is designed for professional plumbers. Do they really need help in learning how to sweat copper and glue plastic pipe? Apparently so, but apparently they need no help on cleanouts or waste systems beyond the house.

tanks great book

This is another down to earth Cauldwell book. It is full of tips on how to do superior work and it's up to date, PEX tubing, air admittance valves etc. I particularly like some of Rex's special tips such as his under the kitchen sink custom drain system. There is also practical advice on what tools are most useful including some specials that you can make yourself. The writing style is enjoyable, informal yet meaty. Reading it is like being mentored by a real world professional who has first hand practical experience to share. It's a bargain.

Cauldwell is a licensed plumber and a licensed electrician. His plumbing book is excellent. Maybe I should have given it 5 stars. I like the one by Peter Hemp just a little better. This book and one of the Peter Hemp books is all you need to do a wealth of plumbing jobs.
