This is exactly what I was looking for for my toddler. A simple, engaging ABC book for teaching the alphabet without too many distracting illustrations. The letters are large and are indented so little fingers can trace them while they learn and the letters are the star of the page. There are two association words/illustrations for each letter, with one being hidden under a flap/door--so it's very engaging!

Love this book! I'm a speech language pathologist so I'm very picky about the books I buy for my child. This is a great one!

My 20 month old knew all of her letters on sight and I credit that mainly to this book. We somehow misplaced it and I am placing another order.

Cute book. Images are easy on the eyes, not too busy. The flip portion is easy to open for both parent and toddler. And the book is made of sturdy good quality thick paper/cardboard.

I've been reading some reviews that seem a little picky to me, but that might be because I'm reading it to my 5 month old. All I know is that she LOVES this book so I had to write a review. It's awesome having two words to talk about for each letter. We noticed she gets excited when we get the book out to read. I can understand that I might be more picky when she's older, but I think this a great book for babies who should be hearing the letters, and not too much more.

My two year old loves this book. I think she's still a little too young to understand the concept of letters but she enjoys tracing the letters and opening the flaps.

Fun book to read with kids. There are flaps to open and little indents to trace your finger along the letter. Interactive reading at its best.

Granddaughter knows the ABC's. This book is great for letting her learn to trace each letter. She is 2 years.
