Had been thinking for a while about getting an adult coloring book. I purchased this one for just

under \$4.00. For the price I thought it would be a good way to get started. It is a book of Mandala designs, which according to Wikipedia means "circle" in Sanskrit and states that they are spiritual and ritual symbols in Indian religions, representing the universe. I was not sure I would enjoy coloring these designs. However, I think this is a very good book to start with because the detail is small and medium. In other words there is plenty of detail to keep an adult interested and to use a lot of creativity at the same time, but not too much that it is too difficult or tedious. I finished the one below in about 1.5 hours. It took me another 30 minutes to paint it, since I was using water color pencils. I like the water color pencils because it gives creative options: one can use just the colored pencil, or go back over picture with a paint brush and create a watercolor look, which really brightened the colors and filled in the white space. For \$4 plus the cost of the pencils this is a great little book which will give me about 70 hours of entertainment and relaxation therapy. (I purchased "Stationary Cupboard 24 Water Color Pencils" which come with a brush and a sharpener. I would recommend these pencils)

I have been dying to get one of these adult coloring books, so I could not wait to get started once this arrived. This designs in this book are so intricate and they are so relaxing to sit and color. There are 35 different designs and there are endless possibilities! The lines are not too thick and not too thin, they are easy to stay within the lines, but they do not take away from the beautiful colors you apply. The pages are thick and although I always use a board behind my pages, the colors usually do not leak through. I have used several different medias with this coloring book and they have all turned out great. I would definitely recommend this to anyone who enjoys coloring. It does take patience, but it is so relaxing that its worth it.

I have always loved to color. It's something I've never grown out of. Imagine my delight with this new craze of adult coloring books. This book is great it's filled with eye pleasing designs that are fun and very relaxing to color. I decided to use gel pens to color a few pictures in this book. I was worried about bleeding so I put a blank page behind the design I was coloring so it wouldn't ruin the next page. I was surprised to find that even with the more liquidy colors I had no problems with the color bleeding through the page. These also take some time to do because there is so much detail to the designs. I had a very relaxing day sitting outside and coloring. My daughter is very jealous that mommy now has her own coloring book.

I have a half dozen coloring books. This is the only one that the paper tears no matter which

medium I use (pens, soft pencil, hard pencil, crayon, or pastel). Of course, most colors bleed. Designs are pretty. I will copy on to decent paper. Also, this is nice for beginners because the pages are small and not too much detail. But what good is this if the paper tears whenever you try to color.

Now that this is a fad, everyone and their brother is coming out with these. Most have turned into major hoopla and you need professional artist pens or they are so detailed you need a magnifying glass and weeks to do them. Most working people do not have that type of time and it causes more stress. This one is easily worked on, big enough you can see, does not require a professional artist ability, and can be done in one sitting if you have the time. I have sent this link to many friends who also have bought it and enjoy it as much as I do and will be looking into the other ones they have.

This is a great little coloring book of mandala designs. I just wish it were bigger for the cost! The designs have a good variety in form and shapes used. The lines are nice and clean, and the paper of nice quality. Colored pencil or dry brush techniques can be used on this paper, though wet media will make it wrinkle, and markers should have an extra sheet of paper insulating between the pages to keep bleeding from going through to the next page. The illustrations are all on the right hand page, with blank backsides. There are no perforations, but it would be easy to remove the pages from the book because there are good sized margins around each image.

This is a beautiful coloring book but it does not have very much variety. The images are all pretty similar. Solid construction, thick paper with one image per page (no front/back images) so you don't have to be concerned with markers bleeding through. Overall, I still think it is a great purchase for the price.

Disclaimer: I was asked to provide an honest review of this product by the seller in exchange for a discounted price. I should also indicate that I look at the picture and read only the highlighted points before purchasing the item so I do not know what others have said or any specifics.

First Impressions: I received my paperback book and flipped through the unique and interesting designs thinking that I could not wait to color again. Each design is on its own page and blank on the back.

Review: Coloring as an adult with adult coloring pages - YES! I have always loved to color but got bored with the different kid coloring books that were available. This coloring book provides unique intricate designs that provide a wonderful opportunity of color and patterns to be created. I teach stress management classes and have begun to introduce the concept of coloring as a great

way to relax. The types of designs provided in this book are perfect to introduce adults to coloring once again. The pages are not perforated, which is the only suggestion I would have for this coloring book for adults. Grade: 5 Star
