The Empress' New Clothes (Trek Mi Q'an Book 1)

Synopsis

Book 1, Installment 1 Modern day Earth woman Kyra Summers is kidnapped by a seven-foot tall, thickly muscled warrior claiming to be her Sacred Mate. Life on his home planet Tryston takes some getting used to, as the laws of the world cater to erotic hedonism and leave females at the sexual subjugation of the barbarians who claim them. Enjoy Kyra's spicy escapades as she adjusts to life and love in another dimension.

Customer Reviews

Don't know what I was expecting, but this definitely wasn't it. So much sex...WOW. If it wasn't for the humor in this book I probably wouldn't have been a fan, BUT I must say that I have never laughed so hard. To me sex and laughter just didn't mix, but I've changed my mind. My husband thought I was crazy. I was trying to go to sleep and couldn't help but bust out laughing as I remembered scenes from the book. My husband threatened to make me sleep on the couch if I didn't shut up. I'm not really into most of the stuff in this book, but I couldn't put it down simply because I was dying to see what happened next. I loved the book and I'll be buying the next as well.

This is a decent book via story and excitement. However, if you read the whole series, as I did, you'll be sorely disappointed. Spoiler Alert -for the series: Ok, so the first book "The Empress' New Clothes" is highly intriguing, albeit a little scattered in the plot. I can live with that. It was a decent book. Then... I followed this "7 book series" onward... I've never before seen such a disorganized storyline or plot in anything I've ever read. You have no idea what happens to half the characters, and the author digresses frequently. The last 2 novellas that she dares to call books are the most substantial pieces of writing; focusing on one subject. The series ends and you never find out what happens to the other main characters. Not only that, but she has left many characters and main plots in the dust. She has a good editor, and a creative mind- but I have NEVER read an author's work that was so scattered, and so poorly put together! I can't believe I paid money to read this!

Im not saying "I don't like it". I'm saying it's not my cup of tea. I must admit, I read erotica for the sex and I love finding authors who can weave the romance of a passionate (i.e.) Julie Garwood or Nora Roberts novel with great, stimulating sex scenes. It's hard to find authors like that. Jaid Black appears to be the polar opposite of a passionate "romance". Yes, there was a story line but it was dwarfed by the sex scenes. So if you want to just read about hard-core sex, exhibitionism, multiple sex with same sex partners, etc. and story line is not what you care about with your tastes, than this book is definitely worth the read. FYI, I picked up this book because I read "Aliens" with a novella from her about Kara & Death which I found sweet but confusing which is why I wanted to get a bigger picture of her world. Well I did, and I'm not really into the Trystonni world..

Ridiculous premise? Check. Shallow characters? Check Boring sex that keeps happening anyway? Check. This book has it all. Oh, and typos, malapropisms and bad grammar... Oh my! I read steamy romances, I read a lot of menage, BDSM, sci-fi, freaky, based-on-nothing-resembling-reality kind of books and I've never, NEVER been so bored, appalled, incredulous as when reading this book. If the "steamy' scenes had been actually steamy instead of disinterested descriptions of some porn movies I've seen this book could have held my interest but throw together a stupid hero (yes, dumb as a box of rocks) a moronic heroine (please, if there are space invaders who want to steal our women let them take women like this one so as to help clear up our gene pool) several one-off appearances by characters I can only assume will have their own books in this series and finally, my favorite, a woman who feels jealous over her man, then thinks about it for the space of a nano-second and then decides she has heretofore unknown bi-tendencies and wouldn't it be cool to

watch her new hubby relieve himself on her new friend.No. Just no.I didn't even make it through the whole book, and I can count on one hand the number of times I've abandoned a story like that. Please save yourself a big disappointment and take a pass on this one.

Unbelievable setting. This world is supposedly more advanced than the primitive first dimension earth, but there is little technology and the world is ruled by male warriors only. Women are for the most part nothing but property. There is nothing to indicate this to be anything but a very primate world compared to Earth ruled by the strongest. Also the biology of the abducted earth women somehow changes so that they lay eggs instead of giving live birth. How does this happen?There is plenty of sex, but not much else and nothing erotic. The sex is receptive and gets boring after a while.

Cray cray. I was super overwhelmed with all the crazy sex going on. It really pushed the limits and was not my cup of tea. At first I was like "wtf this is a joke" but I kept reading on for some reason. I think it was because I had never read anything like it. I thought the characters were amusing and had depth and the story was definitely unique. Don't read this unless you're open to "out of the box" sensuality. But it was interesting and I can't rate it compared to any other book on content because it was original. And the writing was great. So take a leap of faith and read it!

Up until now I thought that books like *The Empress' New Clothes* would hold no appeal to me. I love eroticas and read them often, but this one - I thought - might be a bit too much. Wow! How was I mistaken ! I loved every page of it. Read it in two sittings , forgetting about the outside world completely. I am more than sure You will do the same. I highly recommend this book.
