Customer Reviews

Becky Lamb is a builder, junker, repurposer, blogger, crafter, teacher, wife, and mother of three. She likes to say she was weaned on decoupage glue and feels blessed to be raised by a mom who decorated their home on a very limited budget. Becky has been crafting and creating as long as she can remember and discovered her love for building after retiring in 2000 from teaching elementary school. Her husband patiently taught her to use power tools and she has continued to hone and develop her skills and style. When not building, Becky enjoys spending time outdoors with her family in her home state, Montana.

I think this book is so cute! I was a little nervous when buying it, because I've made very few

wood crafts. But the book walks you through every step, from picking the perfect pallet, to the tools you need, to safety, and so on. My favorite crafts include command center- a message board with places to keep important things. So fun! I've also made a Record Storage Crate for my boyfriend. He loves it! My next goal is to try the entry table. I really love the ideas this book has, and I can't wait to do even more!

Clear directions on how to complete each project. I'm very excited about the ideas in this book as I had not heard of this type craft. yea, I'm so grateful to be turned on to this type crafting. Can hardly wait to get started (just as soon as my hubby feels ready to share construction on these products). So happy to know about this. Thank you for sharing this with all of us who did not know about it. Ever so grateful, Mrs. Bobbie Bear

For someone who lives near a grocery store pallets are definitely not hard to come by. So when I saw this book online I thought "why not?". The book is organized very well and has a variety of projects to choose from like creating a coffee table or my favorite the wine bar. The book is outlined similarly like a cookbook, The tools needed are in the beginning followed by the individual steps. However, unlike cookbooks there are corresponding pictures to the individual steps (so you know what it's supposed to look like at each stage!). This book also embraces the rustic appearance of pallets, so there's no reason to buy a rustic looking wine/bar cart for hundreds of dollars when you can make one yourself.

I was honestly hooked from the Introduction. I loved the personal touch that her mom made her and her sister things on a budget. That's the kind of mom I want to be. So much of the stress of life comes from being uncentered in your home and I loved having all these tips at the ready to make something truly my own (ON A BUDGET--sheesh! That's such a crucial part that stores out there just do NOT seem to GET!). I have so many great ideas now. I am so thrilled that I just moved into a new place because I have so many ways to make it my own now. It's like having the best elements of Pinterest on your shelf but you don't have to be at a loss for how to do it. (That's where I always get stuck). The steps, pictures, personal anecdotes and the connection to the need for books like this to be out there makes the experience reading it engaging and I had my notepad out taking notes on her tips the entire time (and I even knew I was gonna keep the book and could look at it for reference--I just wanted to have this incredibly helpful info at the ready!). Her style is JUST my style also (so that helps me love this book and totally rave about it). Everything is just so cute and I want

my future fully-settled-family-with-kids home to look like that. It was so great to see that this could be accessible to me on a budget, and not just a dream!

Not as many projects as would have liked. Most projects in this book are very basic (step stool). For beginners this would be a great book or a first year wood shop student. The photos are very nice though.

I received this book yesterday and have already made 2 things, working on the third. I'm a newbie, so needed step by step instructions and this told me EVERYTHING I needed to know. It'd get 5 stars if it had more items, but it's still awesome.

I would like more projects, but I guess you can brain storm from what this book shows and try other ideas

Â This book is not a book like I thought it was going to be. Although filled with several amazing ideas, I thought that this was going to be a larger book than what it was. I'm not 100% dissatisfied though, there were some really cool ideas I can't wait to make!
