Numbers 1-100 Flash Cards

Synopsis

With School Zone Flash Cards, 1 to 100 is not such a long way. To your little one, counting all that way seems like such a long journey. You can help make it fun and educational at the same time by introducing numbers in a number of different ways. These flash cards also help your child understand the difference between even and odd numbers. Work with counting cards to help your child develop the skill of counting by 2s, by 5s, and by 10s. The journey to 100 isn't all that far when there are so many fun ways to learn how to get there! Perfect for home or school! Ages 4 and up.

Best Sellers Rank: #3,748 in Books (See Top 100 in Books) #3 in Books > Children's Books > Activities, Crafts & Games > Games > Card Games #19 in Books > Children's Books > Education & Reference > Study Aids > Children's General Study Aids

Age Range: 4 and up

Grade Level: Preschool and up

Customer Reviews

For over 35 years, School Zone has been an innovator in children's educational products. School Zone offers a wide range of educational resources for every curriculum.

I've purchased several flash card packages from School Zone now, and they're just great! The cards are about the same card stock as playing cards, with one side shiny/laminated and the other side not. One thing I noted was that despite the "flimsiness" of the cards that other reviewers mentioned, these cards can take a beating - my two toddlers have bent, squashed, and thrown around these cards and amazingly none of them have torn! Even if they did, for less than \$2 a pack, it's not a problem. The shiny side on the 0-100 Flash card set features numbers 1-50, while the dull side features the numbers 51-100 in a soft red color. This pack also includes a parent teaching card,

a game idea card, a list of odd and even numbers, and a count by 2, 5, and 10 card. We bring these cards with us when we go to restaurants for the kids to learn while waiting - it definitely keeps them busy until our entrees arrive! Highly recommended!

This pack includes 50 cards, with 1-50 on one side and 51-100 on the other. There are also extra cards with odd and even numbers listed, as well as cards with numbers counting in 2s, 5s, and 10s (ex: 5, 10, 15, 20). The visuals make it a lot easier to explain counting in the various ways. My main reason for getting this pack was to help my son remember his numbers up to 100. It's easy for him to count to 31 because he has seen those numbers on the calendars around our house, but we don't use the bigger numbers very often. I thought if he learned to count up to 100, it would make it easier for him to count change, when learning about money. I love the School Zone flashcards. We also have Picture Words Flash Cards and Beginning Sight Words Flash Cards. The flash cards are usually part of 's 4-for-3 promotional sale.

Finally flash cards with JUST numbers on it. No pictures WITH the number to confuse the child.

Perfect for my autistic 5yr old son to practice his numbers with. No frill designs and very easy to read, he has actually gotten better with his numbers because of these cards!! Pros: No frilly designs Easy to read Clear numbers Colors aren't too bright Cons: I wish I could find an easier way to keep them all together! Overall: A wonderful purchase that I was happy to make.

These cards are good quality, and do provide numbers up to 100. I like the fact that they are printed with coordinated colors for the numbers 1 to 50 -- the numbers ending in 1 are all the same color border, etc. However I was disappointed that there are only 50 cards; numbers 51-100 are on the flip sides. That doesn't make it easy to teach counting by tens or to compare numbers. Also, 51 to 100 are all bordered with red, so grouping isn't as easy, and the red side is not laminated. Truthfully, I use my flashcards I bought at the dollar store instead.

Pretty good set of flashcards.

Came just as described.

I expected to receive 100 cards but I only received 50 cards since they printed on both sides.
