## Customer Reviews

I bought this book for board review. Did not find it very helpful at all...not very comprehensive but it seems to be an easy read. In all fairness, because I did not find it useful for boards I did not read most of it. For boards, I recommend Laughing Your Way and PedStudy.

Although I haven't taken the board yet, I think this book is not sufficient to study for the board. Topics that discussed are very detailed but left many important topics. There is too much un-necessary details, good for beginners like medical students but not a review for the board.

I didnt take my board yet, but i think this is a very good ,concise book which highlight the important topics without adding more boring details..yet I'm still looking for another book ..
