Bill Martin Jr. (1916-2004) wrote children's books for more than thirty years. He earned a Ph.D. in early childhood education and was a proponent of using rhyme and rhythm to teach young children how to read. Eric Carle, illustrator of many beloved children's books, was born in the United States, but spent his early years in Stuttgart, Germany, where he studied art and design at the Academy of Applied Art. *Brown Bear, Brown Bear, What Do You See?* was the first book he illustrated.

My 16 month old son loves this book! We first purchased a used paper version which he loved, but quickly ripped apart. After piecing it together with mounds of tape we decided to invest in a cardboard version. This one is nice because you can see and "name" all the animals shown on the tabs across the top and side of the book. You can then easily open the book up to your child's favorite animals by selecting the requisite tab. We love this newer version!

We have a smaller version of this book and my 2 yo loves it. Looking at this one I assumed the big tabs all around it were making noise. My son even tried doing it right away as soon as he saw the book because that's what his other similar books do. To my and my toddler's disappointment nothing happened. So... that makes this book nothing special over the same one but smaller version that we already had which is more convenient for tiny toddler hands anyways.

I got this 50th anniversary edition for my son, 26 years old, as it was by far his favorite book ever along with "Polar Bear, Polar Bear, What Do You Hear?" He looked confused until I explained why I got it for him. I'd love for his children to have the exposure to this lovely book as well. Arrived in perfect shape and with lots of great memories.

My one year old son loves this book. While it's not your typical "Lift the Tab" book, the outer tabs play very nicely into recognition. He loves books he can flip through himself, and has developed a preference for certain pages in different books. He'll sit with a stack of books and turn every page until he finds the page he wanted to see- then he does his little happy face dance. His favorite page in this book is the children page, and with the outer tabs he's figured out how to get to that page independently and without the frustration of going through his whole library- happy face dances all around!

This book is my almost two year old's favorite. I thought we had every version of it, until I spotted this! The tabs with each of the animals make it easy for his little hands to turn the pages. He knows what's coming next and always gets excited for the teacher! Eric Carle has the best books for kids. Thank you providing us with a family favorite!

My daughter has watched the video on her tablet of this book being read a million times. I thought she would love the book because, although she can't read, she could get through this book, since

she knows the video so we'll. I'm very disappointed, having received this lift the tab book, thinking she would have to lift something to find the next animal. Luckily she doesn't know what I was expecting...

This book is good to help kids learn colors and animals. It is the classic book with tabs around the edges that my daughter loves to pull.

My one-year old's fave book. I bought this version for him to play with in the car and it's held up nicely. A pretty large board book, too.
