# The Study Of Human Nature: A Reader

## Synopsis

Now in a new edition, this exceptional anthology provides an introduction to a wide variety of views on human nature. Drawing from diverse cultures over three millennia, Leslie Stevenson has chosen selections ranging from ancient religious texts to contemporary theories based on evolutionary science. An ideal companion to the editor's recent book, *Ten Theories of Human Nature*, 3/e (OUP, 1998), this interdisciplinary reader can also be used independently. *The Study of Human Nature*, 2/e offers substantial selections illustrating the ten perspectives discussed in *Ten Theories of Human Nature*, 4/e--The Bible, Hinduism, Confucianism, Plato, Kant, Marx, Freud, Sartre, B.F. Skinner's behaviorism, and Konrad Lorenz's ethological diagnosis of human aggression. The Islamic tradition is represented by a selection from the 20th-century Iranian philosopher Ayatullah Murtaza Mutahhari. The 17th- and 18th-century philosophers Descartes, Hobbes, Hume, Rousseau, and Kant are also represented. Selections from Rousseau, J.S. Mill, and Nancy Holmstrom discuss alleged differences between women and men, and a paper by Henry Bracken deals with racial issues. Examples from E.O. Wilson's sociobiology and his critics are also included, together with material from Chomsky and from recent evolutionary psychology. This new edition includes more substantial selections from the Hindu, Confucian, and Christian traditions and provides more accessible extracts from Marx, Sartre, and Lorenz. An excellent reader for introductory courses in philosophy, religious studies, human nature, and intellectual history, *The Study of Human Nature*, 2/e, is also an essential resource for anyone interested in ancient, modern, and contemporary perspectives on human nature.

"A superbly well chosen variety of human definitions, equipping readers in the relevant dimensions of psychology, anthropology, sociology, metaphysics, and religion."--George E. LaMore, Jr., Iowa Wesleyan College

Leslie Stevenson is at University of St. Andrews.

Decent reader for getting your feet wet in the field of academic analytic philosophy. The text is easy to read however when dealing with continental or eastern philosophers the author/editor has made some interesting translation choices. The book would be good if the audience was primarily from a monotheistic or moral realist perspective looking to learn more about philosophy as a historical developmental function of society as it is quite tautological.

Fantastic Book. I first came across this awesome piece of literature in a philosophy class in college. Unfortunately, at the time I needed the money so I sold it. Now I have it back in my library and can't wait to re-read it!

tough to follow this author at times.

book was in bad condition

Required material for class.

Wow, it is truly amazing when a book can drastically change your life, as this one did mine. The diverse theories of human nature are awesome to investigate. Some people believe the weirdest shiznit. The class I took allowed me to contemplate deep questions that I didn't even know I had within me. I thought long and hard for many cold nights with a cup of tea in hand, a teddy bear to keep me company. I discovered myself. Who I really am? "I am what I am. I will become what becomes of me." There can be no more solid truth than that. I think my philosophy professor thought I was one step away from the loony bin after she read all my radical theories of human nature. But I only used logic to come to my conclusions. This book takes you on a quest through the

past to review the logic used by ancients and somewhat contemporaries, to come up with personal beliefs about God, life, and existence. Now I don't even know if I exist. I cannot prove it really. Maybe all is a dream world. I wanted to find truth, and this book helped me find a path toward truth. And that is no lie. Buy this book and see what I mean. You will come to understand human nature- hopefully. But buyer beware; you may find that- you too- do not know whether you truly exist.

This fascinating book consist on a compilation of the best writing on the subject of what is to be human. Since the books included here are the bible , other sacred books, Decarte, etc, it is absurd to rate the writer's talents. They have been established a long time ago. Therefore all merit goes to the editor who has done a brilliant job selecting what was worth showing.
