Mapping The Social Landscape: Readings In Sociology

Synopsis

Now with SAGE Publishing, *Mapping the Social Landscape: Readings in Sociology* is one of the most established and widely-used anthologies for Introductory Sociology. Susan J. Ferguson selects, edits, and introduces 58 readings representing a plurality of voices and views within sociology. The selections include classic statements from great thinkers like C. Wright Mills, Karl Marx, Howard Becker, and Max Weber, as well as the works of contemporary scholars who address current social issues. Many of the readings integrate questions of diversity, helping students see the interrelationships among race-ethnicity, social class, and gender, and understand how these relationships have shaped the experiences of all people in society. New selections focus on how Superstorm Sandy damaged social as well as physical structures, gender panics and bathrooms, extreme poverty in the United States, transgender challenges to our understanding of gender, a Muslim American punk rock subculture that is challenging Islamophobia, lessons from the Affordable Care Act, and revolutionary movements for social change.

Best Sellers Rank: #6,279 in Books (See Top 100 in Books) #57 in Books > Textbooks > Social Sciences > Sociology #200 in Books > Politics & Social Sciences > Sociology

Customer Reviews

"[Mapping the Social Landscape] is the best reader for introductory sociology that I have found. It is an excellent collection of sociological work that is presented in a very abridged, student-friendly format. There are well-written introductions to each work by Ferguson which allows students to see how the reading relates to other sociological concepts and topics."--Stephanie Chan (06/02/2016)"I have used *Mapping the Social Landscape* for a decade, and I am pleased with the chosen articles, both classic and contemporary, and with the short introduction to each article. My students enjoy

reading the assigned articles far better than their textbook reading."--Aimee Zoeller (05/23/2016)"[Mapping the Social Landscape] is a great resource. It contains a diverse range of articles or book chapters by sociologists (or academics/journalists writing from a sociological perspective). The articles illustrate key concepts and approaches within sociology, but do not define them, allowing the instructor to explain key ideas in class, without repeating the assigned reading, as often happens with traditional textbooks."

it's a good textbook for beginners in graduate studies. it's not very straightforward and clear in some chapters. you can choose other famous macro books for complement

Bought this for my sociology class. Great book. Very interesting content. Even though I bought it to be used as a text book, I think I'm going to keep it for regular reading.

I bought it on Tuesday and it arrived on Wednesday! Super fast shipping because we both live in California that's why it was so fast but that's beside the point lol seller was very responsive to my questions. Highly recommended!

We used this book in our Soc 101 class. The excerpts were enlightening and well written. It's an easy way to read short stories from key sociologists and others close to the profession. I may just keep this one!

Not great for an intro to soc book because it doesn't really include definitions but I love that it's small and relatively inexpensive. Took forever and a half to get it though, even though I ordered it new and direct from .

A bunch of educational short stories all very interesting and pretty easy to follow made the course one of my favorites

Great

Great Condition
