## Customer Reviews

Attached to this review will be a silent flip-through of the entire coloring book so you can make an informed decision as to whether or not it will work for you. Rather than discuss how this is like or different from the various movies other than to note that images have been used from all six episodes thus far, I will discuss only how I feel about it as an adult coloring book. The book is filled with portrait studies of various character and a lot of kaleidoscope style mandalas. The mandalas generally have a single repeating element from movies (robots, ships, weapons, etc.) What I found missing and would have liked would have been some stand-alone studies of the Death Star and the Millennium Falcon and other ships and vehicles. While I missed those, it doesn't detract from the overall large selection of Star Wars designs to choose from. My favorite characters were all well represented and as I enjoy coloring mandalas, I will have a lot of fun with those, too. The designs range from simple and open (especially many of the mandalas) to complex with intricate design elements (character portraits, especially.) This presents a nice range for me to color depending on

the mood I am in that day. The book has a nice heavyweight cardboard cover (front and back) which makes for a great solid surface to color on. The designs are printed on both sides of the page and the paper is not perforated. The binding is sewn rather than glued, so removing it takes only a few snips with a small scissor on a few pages. There are only four designs which span across two pages. The rest of the designs are all single page with lots of room around the edges so that nothing is lost in the binding. The four two page designs are wallpaper style of repeating patterns and each is dedicated to a single subject: Yoda, R2-D2, C-3PO, Boba Fett, and finally, various ships in the midst of a battle. I think these are really cool designs though they don't line up very well in my particular book. When there are too many of these two-page designs with too much loss of image, I detract a point from my rating. That is not the case with this book " there are so few that it is really insignificant. All of my markers bleed-through on this paper though my Staedler triplus fineliners fared the best with more of a shadow image on the back of the page. I could still identify the color, so it merely bled less than the others. My gel pens worked fine and my coloring pencils worked fantastic " very smooth and creamy on this paper.

I love the variety of beautiful images in this book. The book is very large in comparison to similar books. It has a very thick cardboard-like cover. There seems to be an equal balance of male to female characters to color. All of the characters are from Episode 1 through 6. Overall, the paper seems to be of good quality, but the images are doublesided. I use my water based markers without the color bleeding through. Since images are doublesided, some types of markers cannot be used to color without bleeding through. I have yet to use colored pencils because I have been enjoying using my gel pens and markers to color.

First of all the quality of the materials used to make this book are unquestionably great, with a nice hard cover and very thick pages. The actual images on those pages are a mix of decent Star Wars themed mandalas and abstracts mixed with a lot of characters surrounded by flowers... yes flowers. Pretty much every picture is.... Darth Vader, adorned with tropical flowers.... Yoda springing into action, with a background of garden flowers... Han Solo, behind intricate lattice with flowers. I guess that's what makes this an "adult" coloring book? I'd have preferred fewer flowers myself, but I'll still enjoy this book.

I have always been a Star Wars fan so anything related I must own. I recently took in the hobby if Adult Coloring as it really helps me wind down at night and relieve stress. When searching on and I

see their is a Star Wars Adult Coloring book I knew I must buy it immediately. I am very happy with my purchase and this is the best coloring book I have owned thus far. I love the presentation of the hard cover and Yoda on the front. Their are 100 pages of beautiful Star Wars related artwork just waiting for me to use my imagination and give this coloring book life. Many of the pages are a collaboration of designs multiplied and others are a single picture to be colored. If you love to color and love Star Wars then you cannot go wrong with this book and I highly recommend.I purchased this product full price and all opinions are my own experience and review.

I've been getting into adult coloring books lately. I have gone through several as far as looking at them. From mandalas, to flower patterns, owl patterns, and paisley patterns. Many of those books just make me dizzy looking at all the lines that they have put in the book. I have finally come to realize I am a big Disney fan. Actually, I've known that I've been a big Disney fan since forever. Catherines Saunier-Talec and she is becoming my favorite author for these adult coloring books. I purchased her princess Disney book and loved it. I'm waiting for her villains book, and her animals book. She puts just the right amount of detail in each of her books. She does not overpower the pages with a zillion lines. I decided to go ahead and purchase the Star Wars book. My son has been wanting to color with me. He's been asking me over and over again. I saw that she made a Star Wars book and had to get it for him. He and I have been working on the pages. The pages are perfect. Again, she has put the perfect patterns and the perfect images throughout the entire book. The quality of the pages are extremely durable. My gel pens do not leak through. My watercolor pencils do not leak through. Each page is double sided. You get a hundred pages in each book. I am in love with these coloring books. I will continue to purchase these Disney coloring books and enjoy the time I have with them.
