## Synopsis

David Macaulay takes us on a visual journey through a city's various support systems by exposing a typical section of the underground network and explaining how it works. We see a network of walls, columns, cables, pipes and tunnels required to satisfy the basic needs of a city's inhabitants. --This text refers to an out of print or unavailable edition of this title.

## Customer Reviews

"A straightforward yet fascinating description of the labyrinth beneath the feet of any city dweller. And what a complex covered world David Macaulay reveals! He invents an intersection of two streets and proceeds to show what we all might find if we dared to descend through that Alice-in-Wonderland manhole." The New York Times --This text refers to an out of print or unavailable edition of this title.

My 7 year old son received this book for Christmas. We are currently on our third reading - he LOVES it and can't get enough. I highly recommend this book for any child interested in building, architecture, construction, engineering...

Macaulay is the master of simplifying complex topics. He's easy to follow, extremely well illustrated, and gripping -- which is a lot to be said for an historic architecture series! If you like to know how things work, buy any of his books.

Great. Book was ordered as "like new", was more than pleased when i opened it up. Book looked like it was new, as said. Good job would order it again and again.

This item was advertised and priced as a "library binding" book and I received a paperback copy.

David Macaulay fascinates readers by explaining what is underground in large cities. Not only does the text inform, his drawings are excellent. I always wondered why there is hot air coming up through those grates in sidewalks in the city. Now I know.

Fascinating and informative.

Excellent book for child.

My son was required to read this for school. I too do summer reading so I know what they are reading. This is a very basic overview of things all people should be aware of. A very quick read.
