## Customer Reviews

Bought these series of Kids' Travel Guide by FlyingKids, for my kid, so he can start to learn about different cultures and different countries/cities. I'm simply blown away by the amount of information on the book and how fun it looks, it will teach and be fun at the same time for my kid; which on the other end is always hard to achieve when trying to keep kids engaged in learning. These books are simply great at achieving that, I'm sure my kid will have a blast when it comes time for him to use them. The books are very well made, nice lovely pictures and drawings, also has plenty of interactive activities for the kids to do. It feels like an interactive journal of the trip, so it could also be kept as a memento of the family travels. --By J. Santanal bought this book for my 10 year old. She loves history and learning about new places. The book is full of colorful pictures of different places in Italy. There are tons of kid friendly activities for her to do. It is written in a way that is easy for elementary school kids to read. She has only had it a few day and has already looked through all of it. It has maps and fun facts about various places in Italy. I love the book. --By Sappegirll bought this book for some guests visiting me. I actually live in Italy, so I thought it would be fun to have this book on hand. It is actually designed to be a travel journal for children and it is quite fun. Lots of little tidbits of information and places for kids to write down places and things they encountered. It is not a full travel guide, but for quick entertainment and education on basics of Italy (very basics), this may work for your child. I also liked that they had a decent list of common words and phrases, with the pronunciation, as Italian vowels can sound different than English vowels. It gives pictures of the Euro coins, which is also helpful. The cover is stiff, so it should hold up well for traveling, in and out of packs and such. It would make a nice souvenir and keepsake for a child to remember their trip. --By JackGirl

Sometimes family vacations can be tricky â | You can plan plenty of activities for the kids, but all they want to do is to stay in the hotel room and watch TVâ | You drive hours and hours to a famous attraction and when you get there you find out that the kids are only interested in their mobile devicesâ | When you return home you realize that the kids don't remember much about the new places you were visiting.Â Wellâ | maybe it never happens in your familyâ | but in case it does â “

Kids' Travel Guide - Italy: The fun way to discover Italy - especially for kids (Kids' Travel Guides Book 4) Book has a table of contents to make finding things easier and faster. Note to the parents and then to the kids who will be using the book. What I really liked about this book are the fun things for kids to do and they aren't going to realize they are learning at the same time. I even found some things not only interesting but fun to learn about. Has blanks where the children can fill in the answers about their travel and who is going with them. Helps to prepare for the travel and what to bring. Focuses on many areas and explains a bit about them. What I liked also was the maps and how the country is shaped. I really liked the compass rose - had never heard that phrase before. Also loved about the money and fun puzzles to do. Definitely keep the child busy if he gets bored. Explains what each section is famous for and what you should go visit. Even goes into history and famous people. Foods are discussed: pizza, spaghetti and gelato. Love the part about how to speak the language and some important phrases and how to pronounce them. Restaurant words and shopping words - so useful. Also has quizzes along the way to make sure you are paying attention. Journal to fill in about your trip, what you saw, where you went, etc. Other works with Leonardo are highlighted at the end. I was able to get several more in this series and can't wait to learn about those countries, even some US cities that we've yet to travel to. What a really fun educational, colorful children's book that I can even use if I travel to Italy.

I bought this book to teach my, almost 5 year old about Italy. I liked that it was very interactive. It's more of a travel journal for children that can read and write. She enjoyed the part about Gelato and Pizza, and we practiced the simple greetings in Italian. I plan to keep this book until she is old

enough to use it when we do go to Italy. But for now, it's great as an introduction to Italy.

I ordered the book for my 10 year old son and was very impressed by the unique and colorful design and content. My son embraced the book even before we went on the trip! During the trip it kept him connected to the sites we visited not like previous trips were he had "escaped" to playing with his tablet, nagging and complaints. In addition, I felt that he was learning something out of the trip and the amazing sites we have visited. Recommended!

It's a fun book for kids to prep for Italy trip. It keeps my 6 year old daughter busy and gets her interested in learning all about Italy.

This is the ultimate book to buy to your kids. Well written and designed, tips are great and very helpful. My kids love this colourful book, having a great fun and learning a lots! Very recommended!!!  
Enjoy your trip

I looked through the book and was pleased with it. Is a Christmas gift for my 9 year old grandson as we are going to Italy in March. Hope he will enjoy it and learn a bit before we go.

Daughter had a blast using this in preparation for our trip, highlighting places she wanted to go. Unfortunately, she left it at home before our trip, but it had some great ideas and tips..

A great gift for children who travel to Italy or want to learn about Italy from home
