## Customer Reviews

Just what I needed. I was using a little notebook but it was impossible to find what I needed as it wasn't organized. This notebook is alphabetical, with a spiral binding inside so you can mostly lay it flat and tabs to find what you need more quickly. The cover is plain, so it sort of passes as "not a password book" unless someone opens it to see the front matter. There's only one line for the password, so if you have to change passwords often it's not good, the paper will hold up to some erasing but not a lot. There's 3 sections per page and 10 pages per 2 letters for the smaller size (as it says in the answered questions) so there's no issue with running out of space, though sections like ST are much fuller than YZ.

When I bought this for my husband, I didn't have a lot of hope for him using it, but I have been pleasantly surprised. This little book has made both of our lives better. Hubby used to keep some of

his log on information on scraps of paper in his wallet. He would then need to dig through all of those pieces when he needed to sign on to a web page. He wasn't entirely pleasant to be around during the excavations. This book is small enough to leave near the computer. It has the right amount of space to enter information for web sites as well as sections for useful information and home network settings. There are tab selectors for A-Z to find correct pages. It is a simple solution well executed.

I had purchased the "password vault" before buying this, and straight out of the gate I had issues with the "vault". I sent it back and they were gracious in sending me another one, but I don't trust it, it has too many bugs that need to be worked on, so I purchase this as a back up, and am happy I did! I really like it, it has room for everything, it is small enough to fit in my purse, or to hide. I like the stretch band that helps it to remain closed. I should have purchased this first. I will enter info with pencil so if/when I need to change passwords, there will be no issue or running out of space.

Small enough that I can have it right next to my keyboard. I love the A-Z indexing as it makes it easy to find my passwords. It also has a red elastic band that I can keep the book closed and take with me. Good quality, a lot of extra pages to add web sites and passwords - wonderful!

The Personal Internet Address & Password book is just the thing to keep all those passwords in. I couldn't find this book so I have ordered another style. I didn't like it. When I found this book, I ordered two for the future. I do recommend this book!

Sturdy, great format, spiraled so it will hold up- I've had bound/glued ones and they break down over time. The only thing I'm not fond of is the material on the outside- if your hands are slightly moist it shows and gets shiny.

Man this product is by far the best thing to have when you have so many things to remember from passwords to email address etc. The only thing is if you loose it, then that would be a nightmare. I would suggest writing out hints that you are familiar with in case it is lost

I love this book. It was a need that was waiting to be met.
