# A NEW Look At Adhd; Inhibition, Time And Self-control

## Synopsis

This video provides an accessible introduction to Russell A. Barkley's influential theory of the nature and origins of ADHD. The program brings to life the conceptual framework delineated in Dr. Barkley's book *ADHD and the Nature of Self-Control*. Offering a compelling explanation of how ADHD develops in the individual, the program illuminates the roots of such symptoms as a reduced ability to inhibit one's behavior, problems with managing time effectively, and lack of foresight. Also demonstrated are concrete ways that our growing understanding of the disorder might facilitate more effective clinical interventions. The companion manual reviews and amplifies key ideas and contains helpful suggestions for further reading. The package also includes a leader's guide, providing tips on the optimal use of the video with a variety of audiences.

## Book Information

VHS Tape: 40 pages

Publisher: Guilford Press (2000)

Language: English

ISBN-10: 1572304979

ISBN-13: 978-1572304970

Product Dimensions: 8.4 x 5.5 x 1.3 inches

Shipping Weight: 10.6 ounces

## Customer Reviews

"This video is highly informative, scientific, and professional, and will have an important and positive impact. Dr. Barkley has a tremendous ability to provide very rich information in a short period of time. He communicates difficult concepts in a way that enables people from various backgrounds to understand the main points of his theory. The video will be useful in a wide variety of settings. I will show the video in my office (to parents of newly diagnosed children and to adults with ADHD), in CHADD meetings and parent support groups, and in inservice teacher training. It also will serve as an excellent educational tool for mental health professionals, physicians, nurses, and graduate students. This program will aid in the development of more consistent and scientifically based

protocols to diagnose and treat ADHD. Its coverage of interventions is extremely valuable and hopeful, and includes a good sampling of interventions in the school setting." --Vera Joffe, PhD, Licensed Psychologist "With his usual brilliance, Dr. Barkley presents his latest framework for understanding ADHD. Because these concepts are often complicated to follow in print, this polished and well-produced video is an excellent educational tool, especially for those of us who are somewhat theory-impaired." --Michael Gordon, Ph.D "Barkley is one of the leading investigators, clinicians and thinkers on ADHD. In this video, he attempts to clarify the underlying psychopathological basis of ADHD. He does this in a clear, interesting, and thoughtful manner. The video may lead to improved concepts of diagnosis and management, especially in educational settings. Our clinic found this video interesting, stimulating, and thought provoking, and we recommend it highly to others." --John S. Werry, MD, Emeritus Professor of Psychiatry, University of Auckland, New Zealand
