Customer Reviews

Excellent book. Easy to read, great information and very informative.

This was a very lame book, weak in content and strong in a weaker conversational tone. Worst shooting book I ever read. This guy should turn a weapon on himself and get it zeroed in. It may take quite a few shots.

For the price, you are getting a real gem. I deleted it by mistake and will probably buy it again via kindle. It covers a lot considering it is not a large book but doesn't have a lot of "fluff" but good solid instruction. Should be in every persons library who is interested in marksmanship and shooting the rifle. He covers a lot of ground and in a way you can absorb the info.

See above, very shallow info....needs to go deeper!! I rather read Long range shooting from Ryan Kleckner! Love his book....waiting for his second book.
