book on religion

The fundamental goal of conventional endodontics taught at the US dental schools and that sustained by Sargenti is exactly the same. The common objective is to save endodontically involved teeth from the forcep to prevent the disruption of the masticatory apparatus. The debate whether the Sargenti modalities are acceptable or not is a mere exercise in futility because the N2 Method has already shown its effectiveness in a long period of extensive clinical application. The Sargenti procedures are routinely used by thousands of practising dentists in the USA as well as all over the world. THE SCIENTIFIC BACKGROUND of the N2 Method has already been established three decades ago by internationally recognized European researchers. The list of published studies appears in the literature which accompanies all textx on Sargenti Endodontics.--- from book's prefatory notes
