Emergency Medical Responder: First On Scene (10th Edition) (EMR)

Synopsis

For courses in First Responder and Emergency Medical Services Learn to think like an EMR The leader in the field, *Emergency Medical Responder*, Tenth Edition, provides clear, first responder-level training for fire service, emergency, law enforcement, military, civil, and industrial personnel. The new edition retains all of the successful features from previous editions and includes new topics and concepts that have recently become part of most Emergency Medical Responder programs. Using the new National Emergency Medical Services Education Standards for Emergency Medical Responders as a foundation, *Emergency Medical Responder* also includes the 2010 American Heart Association guidelines for Cardiopulmonary Resuscitation and First Aid. Critical-thinking First on Scene scenarios and From the Medical Director features offer readers a real-world perspective that will help them learn to think like EMRs.

Customer Reviews

Chris Le Baudour has been working in the EMS field since 1978. In 1984, Chris began his teaching career in the Department of Public Safety's "EMS Division at Santa Rosa Junior College in Santa Rosa, California. Chris holds a master's degree in education with an emphasis in online teaching and learning as well as numerous EMS and instructional certifications. Chris has spent the past 30 years mastering the art of experiential learning in EMS and is well known for his innovative classroom techniques and his passion for both teaching and learning in both traditional and online classrooms. Chris is very involved in EMS education at the national level and served six years as a

board member of the National Association of EMS Educators and advises many organizations throughout the country. Chris is a frequent presenter at both state and national conferences and a prolific EMS writer. Along with numerous articles, he is the author of *Emergency Care for First Responders* and coauthor of *EMT Complete: A Basic Worktext*, and an *Emergency Medical Responder Workbook* and *Active Learning Manual for the EMT-Basic*. Chris and his wife, Audrey, have two children and reside in northern California. David Bergeron was very active in the development of instructional and training programs for the emergency medical services (EMS) for more than 35 years. His early work included a front-row seat to the development of modern patient assessment and care inspired by the studies of Dr. R. Adams Cowley, Maryland Shock Trauma Center, Maryland Institute of EMS Systems, and Maryland Fire and Rescue Institute (MFRI). David's work in instructional development for emergency medicine has included EMT-Basic, Emergency Medical Responder (First Responder), EMT-Intermediate, and EMT-Paramedic student and instructor programs. He is credited with writing the first comprehensive textbook for the first responder, for establishing the first behavioral objectives for EMTs, and for being the first to develop a full-course glossary for EMT instruction. As well as having served as an instructional technologist on leading textbooks in emergency medicine, David was on the teaching faculty of the University of Maryland, Longwood University, and numerous community colleges and schools of nursing. His publications include textbooks that have been translated into Spanish, Portuguese, French, German, Italian, Lithuanian, and Japanese. David passed away on April 10, 2012, after a long illness.

Great. Bought this one after I was completely ripped off by that piece of garbage the AAOS calls their EMR textbook. I'm already an EMR and am just using this as a reference and also to train lifeguards. This one is fantastic. The organization is exceptional. The design and illustrations are extremely modern. The information is completely up to date and new advances in pre-hospital medicine have been added. The book is extremely thorough. It definitely seems like the authors cared very much about the quality when they wrote it. There are some gaps in information in the patient assessment chapter and that's why I knocked off two stars. Maybe it didn't get edited accidentally because they forgot to talk about the airway step in the primary assessment and barely talked about the primary for responsive patients. This really bothers me as that is some pretty important information. Other than that, the book is fantastic; This is the best and most comprehensive EMR text out there.

Received this book for my academy class that I am in and needed it for. The book that I got is the same book that everyone else had in my class, except it does not come with any answer guides in the back of the book which the rest of my classes did. Could not study properly because I did not have answer keys for the tests. Not a great buy.

Great book, Got me to pass NREMT first responder.

This book is great if you're using it for a class or to just brush up on some material. I found it really handy. It's one of the books I actually used!! I did, however, return it because I needed more money to buy my next set of textbooks. Lol, college life.

They are books

Easy to follow along and the workbook really helps

way to expensive but great book, some things need to be changed as some info is incorrect but most is up to date.

Well my kid need this for school so it served it's purpose! :-) Good condition as expected and fast shipping. Thanks
